Senior Infrastructure Automation Architect | Data Protection & Resilience Engineering

Enthusiastic technical professional with 10+ years of experience managing enterprise systems, specializing in data protection, backup automation, and infrastructure resilience. Architected a global provisioning framework managing 20,000+ virtual machines with integrated Rubrik Security Cloud backup policies ensuring 100% RTO/RPO compliance. Expert in building API-driven automation workflows across VMware, ServiceNow, Infoblox, Rubrik, and Ansible Automation Platform within regulated banking environments. Proven track record delivering operational efficiency improvements, including \$400k in licensing savings, automated disaster recovery solutions, and the engineering of first-of-their-kind backup lifecycle integrations that eliminated manual intervention while maintaining audit compliance.

WORK EXPERIENCE

M&T Bank 03/2019 - Present

Automation Engineer (formerly Systems Engineer)

- **Data Protection Architecture::** Engineered a global server provisioning framework that deployed and managed 20,000+ virtual machines; integrated VMware APIs to automate backup policy assignment and compute placement, ensuring 100% RTO/RPO compliance without manual data protection team intervention.
- **Disaster Recovery Automation::** Partnered with Database Architects to automate "Always-On" MS SQL clusters across three geo-redundant data centers; implemented an automated firewall rule request system to ensure seamless inter-cluster communication and recovery capabilities.
- **Operational Efficiency::** Developed an intelligent IP provisioning engine via InfoBlox API integrations, eliminating 1,000+ annual engineering hours by resolving a multi-year infrastructure bottleneck through REST API-driven automation.
- **Governance & Compliance::** Designed an end-to-end "Auto-Decommission" workflow with integrated ServiceNow Change Control API integrations for generation and closure of audit-compliant paperwork, reducing administrative overhead by 100% per retirement while ensuring regulatory compliance.
- **Cost Optimization::** Orchestrated the migration of 850 branch file servers within a strict 3-month window using custom PowerShell automation, resulting in \$400,000 in extended licensing fees through efficient lifecycle management.
- **Infrastructure Strategy::** Modernized legacy data center networking by collaborating with Network Architects to design high-capacity subnets; implemented automated DMZ provisioning for the first time in bank history.
- **Risk Mitigation::** Authored Active Directory lifecycle scripts with built-in "Read-Only" dry-run modes; implemented Least Privilege permissions and robust rollback protocols for stale object cleanup to ensure operational safety.

OTG Management 07/2013 - 02/2019

Lead Network Engineer

- **Security Architecture::** Engineered a secure reverse proxy solution to protect sensitive internal infrastructure, enabling customer online operations while mitigating external threat vectors.
- **Infrastructure Resilience::** Architected a highly redundant DNS solution that significantly reduced network outages and optimized global traffic flow.
- **Cloud Connectivity::** Established secure, encrypted VPN tunnels to bridge on-premise networks with cloud resources, ensuring seamless hybrid operations.

Network Engineer

- **Cybersecurity Governance::** Directed enterprise-wide vulnerability scanning and remediation efforts for internal and external systems to maintain a strong security posture.
- **Network Administration::** Managed complex firewall rules and switch ACLs for a massive distributed network spanning 12 airports and 3 satellite locations.
- **Proactive Monitoring::** Developed service-aware alerting frameworks for business-critical systems, reducing mean time to resolution (MTTR) through proactive incident detection.
- **Mobile Management::** Successfully onboarded and managed 15,000 iPads via Meraki MDM, enabling centralized cloud-based control of enterprise mobile assets.

Systems Administrator

- **Disaster Recovery::** Spearheaded the deployment of Datto backup and disaster recovery appliances to ensure 100% business continuity for critical operations.
- **Operational Visibility::** Modernized infrastructure monitoring by designing custom Grafana dashboards to visualize real-time performance metrics.

SKILLS

Languages: PowerShell, Python, YAML, SQL, Bash, Javascript, PHP

Automation/Orchestration: Ansible Automation Platform, REST API, GraphQL, CI/CD Pipelines, ServiceNow, Gitlab, Source Control, Disaster Recovery, Grafana, Time-series Database

Infrastructure: Rubrik, VMware vSphere, Azure, Infrastructure as Code, Active Directory, Disaster Recovery, Policy-driven storage tiering, Infoblox, Windows Server, Red Hat Linux, Server Lifecycle, Nutanix AHV, Citrix Virtual Apps, Group Policy, IIS, NGINX, Reverse Proxy, Artifactory, SSL/TLS, RAID, Datto

Networking: DNS, VPN, High Availability, Firewall Rules, Load Balancing, F5, Uptime Monitoring, Vulnerability Scanning, Intrusion Detection, VRRP, BGP, Meraki, Arista

EDUCATION

Bachelor Of Science in Computer Information Systems

SUNY Fredonia -- 12/2012

CERTIFICATIONS

Certified Meraki Network Operator - Meraki

VOLUNTEERING & LEADERSHIP

Habitat For Humanity 07/2025 - Present

Volunteer -- Buffalo

Tifft Nature Preserve 01/2025 - Present

Volunteer -- Buffalo, NY

716 Paws 01/2022 - Present

Thermal drone pilot for search and rescue missions. -- Buffalo
