Senior DevOps Engineer & Infrastructure Automation Architect

Results-driven DevOps professional with 10+ years of experience architecting scalable, cloud-native infrastructure and CI/CD pipelines for enterprise environments. Expert in Infrastructure as Code (Terraform, Ansible), having built automated provisioning frameworks managing 20,000+ virtual machines with 100% compliance. Proven track record of enhancing developer velocity through robust automation, monitoring solutions, and API-driven workflows across VMware, ServiceNow, Infoblox, and Rubrik. Demonstrated ability to balance rapid deployment cadence with operational excellence, delivering \$400k in cost savings while maintaining high availability across geo-redundant data centers.

WORK EXPERIENCE

M&T Bank

03/2019 - Present

Automation Engineer (formerly Systems Engineer)

- **DevOps & CI/CD:** Developed scalable CI/CD pipelines utilizing Terraform automation to standardize environment deployments and reduce configuration drift across the enterprise.
- **Architectural Scale:** Engineered a global server provisioning framework that deployed and managed 20,000+ virtual machines; integrated Rubrik and VMware APIs to automate backup and compute placement, ensuring 100% RTO/RPO compliance at build time.
- **Operational Efficiency:** Developed an intelligent IP provisioning engine via Infoblox API integrations, eliminating 1,000+ annual engineer hours and resolving a multi-year infrastructure bottleneck.
- **Governance & Compliance:** Designed an end-to-end 'Auto-Decommission' workflow with integrated ServiceNow Change Control APIs; automated the generation and closure of audit-compliant paperwork, reducing administrative overhead by 100% per retirement.
- **Infrastructure Resilience:** Engineered and maintained a highly resilient infrastructure architecture spanning three identical, geo-redundant data centers to ensure maximum uptime and disaster recovery readiness.
- **High-Availability Engineering:** Partnered with Database Architects to automate 'Always-On' MS SQL clusters across three geo-redundant data centers; pioneered an automated firewall rule request system to ensure seamless inter-cluster communication.
- **Cost Optimization:** Orchestrated the migration of 850 branch file servers within a strict 3-month window using custom PowerShell automation, avoiding \$400,000 in extended licensing fees.
- **Risk Mitigation:** Authored Active Directory lifecycle scripts with built-in 'Read-Only' dry-run modes; implemented Least Privilege permissions and robust rollback protocols for stale object cleanup.
- **Infrastructure Strategy:** Modernized legacy data center networking by collaborating with Network Architects to design high-capacity subnets, enabling fully automated DMZ provisioning for the first time in bank history.

OTG Management

07/2013 - 02/2019

Lead Network Engineer

- **Infrastructure Resilience:** Architected a highly redundant DNS solution that significantly reduced network outages and optimized global traffic performance.
- **Cloud Connectivity:** Established secure, encrypted VPN tunnels to bridge on-premise networks with cloud resources, ensuring seamless hybrid-cloud operations.
- **Security Architecture:** Engineered a secure reverse proxy solution to protect sensitive internal infrastructure, enabling customer online ordering while mitigating external threat vectors.

Network Engineer

- **Proactive Monitoring:** Developed service-aware alerting frameworks for business-critical systems, reducing mean time to resolution (MTTR) through proactive incident detection.
- **Cybersecurity Governance:** Directed enterprise-wide vulnerability scanning and remediation efforts for internal and external systems to maintain a hardened security posture.
- **Network Administration:** Managed complex firewall rules and switch ACLs for a massive distributed network spanning 12 airports and 3 satellite offices.
- **Mobile Management:** Successfully onboarded and managed 15,000 iPads via Meraki MDM, enabling centralized cloud-based control of enterprise mobile assets.

Systems Administrator

- **Operational Visibility:** Modernized infrastructure monitoring by designing custom Grafana dashboards to visualize real-time performance metrics.
- **Disaster Recovery:** Spearheaded the deployment of Datto backup and disaster recovery appliances to ensure 100% business continuity for critical operations.

SKILLS

Languages: Python, Bash, PowerShell, YAML, SQL, Javascript, PHP

Automation/Orchestration: Terraform, Ansible Automation Platform, CI/CD Pipelines, Gitlab, REST API, GraphQL, ServiceNow, Source Control, Grafana, Time-series Database, Disaster Recovery

Infrastructure: Infrastructure as Code, Azure, VMware vSphere, Red Hat Linux, Active Directory, Rubrik, Infoblox, Nutanix AHV, Windows Server, Server Lifecycle, NGINX Reverse Proxy, SSL/TLS, IIS, Citrix Virtual Apps, Artifactory, Group Policy, Policy-driven storage tiering, RAID, Datto

Networking: DNS, VPN, Firewall Rules, Load Balancing, High Availability, F5, BGP, VRRP, Meraki, Uptime Monitoring, Intrusion Detection, Vulnerability Scanning, Arista

EDUCATION

Bachelor Of Science in Computer Information Systems

SUNY Fredonia -- 12/2012

CERTIFICATIONS

Certified Meraki Network Operator - Meraki

VOLUNTEERING & LEADERSHIP

Habitat For Humanity 07/2025 - Present

Volunteer -- Buffalo

Tift Nature Preserve 01/2025 - Present

Volunteer -- Buffalo, NY

716 Paws 01/2022 - Present

Thermal drone pilot for search and rescue missions. -- Buffalo
