DevOps & Infrastructure Automation Engineer | CI/CD, Terraform, Ansible, Python

DevOps-focused infrastructure engineer with 10+ years of experience ensuring high availability, disaster recovery, and zero-downtime operations for enterprise-critical platforms. Architected resilient, geo-redundant infrastructure spanning three data centers and 20,000+ virtual machines with 100% RTO/RPO compliance. Deep hands-on expertise in CI/CD pipelines (Terraform, Ansible, GitOps), Python and Bash scripting, monitoring and alerting frameworks, and cross-functional incident resolution. Proven ability to diagnose complex production issues, automate deployments at scale, and collaborate across infrastructure, security, and engineering teams.

WORK EXPERIENCE

M&T Bank

03/2019 - Present

Automation Engineer (formerly Systems Engineer)

- **Infrastructure Resilience:** Engineered and maintained a highly resilient infrastructure architecture spanning three identical, geo-redundant data centers, meeting 99.999% uptime targets and ensuring disaster recovery readiness for business-critical services.
- **Hybrid Cloud & GitOps:** Architected GitOps-driven CI/CD pipelines using Terraform to automate deployment of virtual machines to Azure; implemented a pull request-based workflow that standardized infrastructure changes through automated plan/apply cycles, streamlining production deployments.
- **Architectural Scale:** Engineered a global server provisioning framework deploying and managing 20,000+ virtual machines; integrated Rubrik and VMware APIs to automate backup and compute placement, ensuring 100% RTO/RPO compliance at build time.
- **Platform Engineering & Middleware:** Designed and developed a custom Python orchestration application as middleware between ServiceNow and Ansible Automation Platform; implemented advanced retry logic, auto-remediation of deployment failures, and a pub/sub queue model for high-volume scaling.
- **End-to-End Hardening & Provisioning:** Developed a zero-touch build workflow delivering fully patched and hardened Linux (Ansible) and Windows (GPO) servers; automated agent installation, drive formatting, and configuration management at scale.
- **Cloud Abstraction & Redesign:** Refactored legacy on-premises automation workflows to be fully cloud-agnostic, enabling seamless deployment to Azure; designed the abstraction logic to be transparent to end users, maintaining a consistent interface while supporting hybrid-cloud operations.
- **Network Security Automation:** Automated Check Point firewall rule generation and DMZ provisioning; integrated security policy updates into the server build cycle to ensure day-zero network isolation and a hardened security posture.
- **Operational Efficiency:** Developed an intelligent IP provisioning engine via InfoBlox API integrations, eliminating more than 1,000 annual engineering hours and resolving a multi-year infrastructure bottleneck.
- **Cost Optimization:** Orchestrated the migration of 850 branch file servers within a strict 3-month window using custom PowerShell and Bash automation, avoiding \$400,000 in extended licensing fees.
- **Database as a Service (DBaaS):** Collaborated with Database Engineering to architect a high-performance on-premises SQL cluster, enabling a unified DBaaS offering that consolidated fragmented legacy databases and streamlined application delivery.
- **Technical Leadership:** Serve as a primary mentor for the Technology Development Program (TDP), setting enterprise-wide standards for naming conventions, Git branching strategies, and unit testing for infrastructure code.
- **Risk Mitigation:** Authored Active Directory lifecycle scripts with built-in "Read-Only" dry-run modes; implemented least-privilege permissions and robust rollback protocols for stale object cleanup.

OTG Management

07/2013 - 02/2019

Lead Network Engineer

- **Performance Engineering:** Diagnosed and resolved a mission-critical server hang by identifying a NUMA architecture mismatch; realigned vCPU/memory topology to eliminate cross-node latency and restore production system stability.
- **Infrastructure Resilience:** Architected a highly redundant DNS solution that significantly reduced network outages and optimized global traffic performance across distributed environments.
- **Cloud Connectivity:** Established secure, encrypted VPN tunnels to bridge on-premises networks with cloud resources, ensuring seamless hybrid-cloud operations and service continuity.
- **Security Architecture:** Engineered a secure reverse proxy solution to protect sensitive internal infrastructure, enabling customer online ordering while mitigating external threat vectors.

Network Engineer

- **Proactive Monitoring:** Developed service-aware alerting frameworks for business-critical systems, reducing mean time to resolution (MTTR) through proactive incident detection and on-call support.
- **Cybersecurity Governance:** Directed enterprise-wide vulnerability scanning and remediation efforts for internal and external systems to maintain a hardened security posture.
- **Network Administration:** Managed complex firewall rules and switch ACLs for a large distributed network spanning 12 airports and 3 satellite offices, ensuring continuous availability.

- **Enterprise Mobility:** Successfully onboarded and managed 15,000 iPads via Meraki MDM, implementing automated security protocols including geofencing, remote-wipe triggers, and custom application deployment.

Systems Administrator

- **Disaster Recovery:** Spearheaded the deployment of Datto backup and disaster recovery appliances to ensure 100% business continuity for critical operations.
- **Operational Visibility:** Modernized infrastructure monitoring by designing custom Grafana dashboards to visualize real-time performance metrics, enabling faster incident detection and resolution.

SKILLS

Languages: Python, Bash, PowerShell, YAML, SQL, Javascript, PHP

Automation/Orchestration: CI/CD Pipelines, Terraform, Ansible Automation Platform, GitOps, Gitlab, Jenkins-compatible workflows, Grafana, REST API, GraphQL, ServiceNow, Middleware Development, Unit Testing

Infrastructure: Azure Cloud Services, VMware vSphere, Infrastructure as Code (IaC), OS Hardening (CIS/STIG), Rubrik, Nutanix AHV, DBaaS, Check Point Firewalls, Active Directory, NUMA Tuning

Networking: High Availability, DNS, BGP, F5 Load Balancing, VPN, VRRP, Intrusion Detection, Vulnerability Scanning, Meraki MDM

EDUCATION

Bachelor Of Science in Computer Information Systems

12/2012

SUNY Fredonia

CERTIFICATIONS

Certified Meraki Network Operator

Meraki

VOLUNTEERING & LEADERSHIP

Habitat For Humanity

07/2025 - Present

Volunteer

Tift Nature Preserve

01/2025 - Present

Volunteer

716 Paws

01/2022 - Present

Thermal drone pilot for search and rescue missions.
