## Senior Network Operations Engineer | Datacenter Infrastructure & Automation Specialist

Seasoned network and infrastructure engineer with 10+ years managing enterprise-scale production environments. Proven expertise in datacenter operations, incident response, and large-scale network fabric troubleshooting across distributed sites. Specialized in building operational automation, maintaining critical infrastructure uptime, and leading cross-functional incident resolution. Deep hands-on experience with BGP, DNS architecture, distributed monitoring frameworks, and scripting for operational efficiency. Successfully managed multi-site network infrastructure spanning 12+ locations while developing proactive monitoring and alerting systems that reduced MTTR. Expert in coordinating vendor escalations, managing hardware break-fix workflows, and building real-time observability dashboards using Grafana and time-series databases.

## WORK EXPERIENCE

---

### M&T Bank

03/2019 - Present

#### Automation Engineer (formerly Systems Engineer)

- **Operational Efficiency:** Developed an intelligent IP provisioning engine via InfoBlox API integrations, eliminating 1,000+ annual engineer hours and resolving a multi-year infrastructure bottleneck.
- **Architectural Scale:** Engineered a global server provisioning framework that deployed and managed 20,000+ virtual machines; integrated Rubrik and VMware APIs to automate backup and compute placement, ensuring 100% RTO/RPO compliance at build-time.
- **Infrastructure Strategy:** Modernized legacy data center networking by collaborating with Network Architects to design high-capacity subnets, enabling fully automated DMZ provisioning for the first time in bank history.
- **High-Availability Engineering:** Partnered with Database Architects to automate "Always-On" MS SQL clusters across three geo-redundant data centers; pioneered an automated firewall rule request system to ensure seamless inter-cluster communication.
- **Cost Optimization:** Orchestrated the migration of 850 branch file servers within a strict 3-month window using custom PowerShell automation, avoiding \$400,000 in extended licensing fees.
- **Governance & Compliance:** Designed an end-to-end "Auto-Decommission" workflow with integrated ServiceNow Change Control APIs; automated the generation and closure of audit-compliant paperwork, reducing administrative overhead by 100% per retirement.
- **Risk Mitigation:** Authored Active Directory lifecycle scripts with built-in "Read-Only" dry-run modes; implemented Least Privilege permissions and robust rollback protocols for stale object cleanup.

### OTG Management

07/2013 - 02/2019

#### Lead Network Engineer

- **Infrastructure Resilience:** Architected a highly redundant DNS solution that significantly reduced network outages and optimized global traffic performance.
- **Security Architecture:** Engineered a secure reverse proxy solution to protect sensitive internal infrastructure, enabling customer online ordering while mitigating external threat vectors.
- **Cloud Connectivity:** Established secure, encrypted VPN tunnels to bridge on-premise networks with cloud resources, ensuring seamless hybrid-cloud operations.

#### Network Engineer

- **Network Administration:** Managed complex firewall rules and switch ACLs for a massive distributed network spanning 12 airports and 3 satellite offices.
- **Proactive Monitoring:** Developed service-aware alerting frameworks for business-critical systems, reducing mean time to resolution (MTTR) through proactive incident detection.
- **Cybersecurity Governance:** Directed enterprise-wide vulnerability scanning and remediation efforts for internal and external systems to maintain a hardened security posture.
- **Mobile Management:** Successfully onboarded and managed 15,000 iPads via Meraki MDM, enabling centralized cloud-based control of enterprise mobile assets.

#### Systems Administrator

- **Operational Visibility:** Modernized infrastructure monitoring by designing custom Grafana dashboards to visualize real-time performance metrics.
- **Disaster Recovery:** Spearheaded the deployment of Datto backup and disaster recovery appliances to ensure 100% business continuity for critical operations.

## SKILLS

---

**Languages:** Python, PowerShell, Bash, SQL, YAML, Javascript, PHP

**Automation/Orchestration:** Grafana, REST API, Time-series Database, ServiceNow, Ansible Automation Platform, CI/CD Pipelines, Gitlab, Source Control, GraphQL, Disaster Recovery

**Infrastructure:** VMware vSphere, Nutanix AHV, Red Hat Linux, Windows Server, Active Directory, Infoblox, Infrastructure as Code, Rubrik, Azure, Server Lifecycle, NGINX Reverse Proxy, Group Policy, SSL/TLS, IIS, Citrix Virtual Apps, Policy-driven storage tiering, RAID, Artifactory, Datto

**Networking:** BGP, DNS, Firewall Rules, High Availability, VPN, Load Balancing, VRRP, Uptime Monitoring, F5, Meraki, Arista, Intrusion Detection, Vulnerability Scanning

## EDUCATION

---

### Bachelor Of Science in Computer Information Systems

SUNY Fredonia -- 12/2012

## CERTIFICATIONS

---

**Certified Meraki Network Operator** - Meraki

## VOLUNTEERING & LEADERSHIP

---

**Habitat For Humanity** 07/2025 - Present

Volunteer -- Buffalo

**Tift Nature Preserve** 01/2025 - Present

Volunteer -- Buffalo, NY

**716 Paws** 01/2022 - Present

Thermal drone pilot for search and rescue missions. -- Buffalo
